SUMMARY

Experienced software developer, with a strong focus on NodeJS and a recent dive into Java. I thrive in team-oriented settings and have had the opportunity to work across various industries, adapting my skills to diverse project domains, taking ownership and acquiring the knowledge necessary to build, along with my team, world-class solutions. I specialize in collaborating with teams both on-site and remotely, putting extra effort on the best practices, architecture design and performance. My objective lies in contributing to projects that challenge my technical abilities, and to grow professionally by acquiring new skills and putting into practice the previously obtained ones. I consider myself a responsible, sociable, reliable, proactive, self-starter, constantly learning person.

EXPERIENCE

Kavak

July 2021 - Present

Sr. Software Developer

- Backend development with Typescript and NodeJS. Database management with MongoDB and PostgreSQL. Monolith architecture with implementation and migration to microservices. Currently also working with Java for two years, coding a business rule engine with pricing strategies and files processing.
- NX, Scrum methodology, AWS, monitoring with Datadog and Grafana, serverless functions, GraphQL, API's and both integration and unit testing. Backend focus.
- Promoted from Ssr. to Sr. within 9 months due to autonomy, performance and organizational impact.

CodigoDelSur

February 2021 - July 2021

Backend Developer

- Software development in NodeJS and Typescript. AWS + DynamoDB.
- Events handling and focus on document management and generating PDF files.

NaranjaX

June 2020 - July 2021

Backend Developer

- Backend developer in NodeJS, microservices structure, various testing tools, Scrum methodology, continuous integration. Maintenance and monitoring. AWS, DynamoDB and MongoDB, documentation on OpenAI, middlewares. API oriented development and knowledge of Fintech business.
- Strong user orientation in tune with Product and UX/UI and dynamic screens from Backend.
- Development Highlights: Toque.

Wolox

May 2019 - June 2020

Backend Developer

- Backend developer in NodeJS with various technologies and database management (MongoDB with Loopback and PostgreSQL with Sequelize). Integration with API's, documentation and maintenance of architectures, microservices and serverless development. Knowledge of middlewares, Azure functions and storage, testing and API queries with Postman.
- Scrum and use of the English language in many ceremonies.
- Worked in a retail project for Falabella.

Aper

March 2019 - May 2019

Full Stack Developer

- PHP, CSS, HTML and Javascript. Handling of online store development environments with Prestashop. Database management.

FIUBA

January 2019 - February 2020

Teaching Assistance - Algorithms and Programming II

- Correction of tests and mid-term examinations, lecturing and preparation of tests and exercise guides. Méndez Chair.

Hi!Tech - Company Owner

January 2015 - January 2018

Private teacher

- Mathematics, C programming language and English classes.

EDUCATION

Informatics Engineering

2022 - Present

UADE

- 2023 - Intermediate Degree in Computer Analysis.
- *Buddy*: Thesis project for intermediate degree about Grooming.
- Master equivalent. Coursing the fourth year of the degree.

Informatics Engineering

2016 - 2020

FIUBA

- Subjects passed: English, Algorithms and Programming I, II and III, Language Theory (with PHP report), Chemistry (course passed) and the Common Basic Cycle.
- Master equivalent.

ADDITIONAL INFORMATION

Technical Skills

- **Programming Languages**: NodeJS (5 years), Typescript (4 years), Java (2 years), HTML, CSS and PHP (less than a year). C++, C and Smalltalk at University.
- **Databases**: MongoDB (5 years), PostgreSQL (4 years), DynamoDB (3 years) and MySQL (less than one year).
- **Tools and Methodologies**: Scrum (5 years). Jira and Trello for backlog management, Datadog, Opsgenie and Grafana to handle monitors, alerts and logs, Mocha and Jest for testing. Amazon Web Services (AWS) and Azure for cloud services, and Gitlab and Github to manage repositories. Docker and Kubernetes management. Postman and Insomnia to dispatch queries.
- **Architecture**: Worked with monolithic and microservices architecture. Used GraphQL and frameworks such as Express and Loopback.

Certifications & Training: Azure Virtual Training Day: Fundamentals (2023 - Microsoft Azure)

Languages: English (fluent), Spanish (fluent). Italian (basic), French (basic), Norwegian (Basic), Japanese (Basic).

Soft Skills: Team-oriented, autonomy, adaptability, ownership, experience collaborating both on-site and remotely with small and large teams, extra effort on the best practices, proactive, self-starter. Experience working with startups and projects from scratch.
